-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 28-45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 2,362,240 in view of Bonilla ('240).

The difference between patent claim 18 and instant application claim 28 is a sliding member longitudinally slidable on the breathing tube into contact with the cup member upon submersion of the splash guard so as to substantially prevent passage of water between the cup member and the sliding member.

Bonilla, in a snorkel, teaches a sliding member (22) longitudinally slidable on the breathing tube (11) into contact with the cup member upon submersion of the splash guard for the purpose of substantially preventing passage of water between the cup member and the sliding member (page 1, col.2, lines 27-29 and page 2, col.1, lines 35-39).

It would have been obvious to modify the snorkel defined by patent claim 18 to include a sliding member longitudinally slidable on the breathing tube because it would have substantially prevented passage of water between the cup member and the sliding member responsive to submersion of the snorkel as taught by Bonilla.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 46 is rejected under 35 U.S.C. 102(b) as being anticipated by Bedini et al. ('568).

As to claim 46, Bedini et al. discloses a method of blocking passage of water into a submerged snorkel, comprising the steps of: (a) providing a snorkel including an elongate breathing tube (3), an opening (3' of fig.6) in an upper portion of the breathing tube, an opening (col.2, lines 39-42) in a lower portion of the snorkel, and a mouthpiece (4) positioned at the opening, the snorkel further including a splash guard (7,8) having a cup member on an upper end of the breathing tube, and a sliding member (10) longitudinally slidable (col.3, lines 12-14) on the breathing tube; (b) positioning the snorkel on the head of a swimmer, with the swimmer's mouth in contact with the mouth piece and in fluid communication with the opening (figs.1 and 2); (c) causing the swimmer to submerge the breathing tube in water, submersion of the splash guard causing the sliding member to slide into contact with the cup member and to

substantially prevent passage of water between the cup member and the sliding member (col.3, lines 18-23 and lines 28-33).

Claim Objections

5. Claim 46 is objected to because of the following informalities: in line 5, "...mouthpiece positioned at the opening..." is unclear as to exactly which opening (as two different openings are previously defined) the mouthpiece is positioned. Appropriate correction is required.

Conclusion

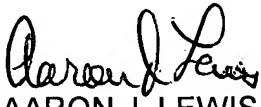

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The balance of the art is cited to show relevant snorkels.
